List of promotions

Gets a list of current promotions API

Use the [Gets a list of current promotions](#) API to access a list of active new commerce promotions for a given market (country or region) and segment. This method returns available current promotions based on the promotion availability start and end dates.

What the response includes

Entering the relevant segment and country code as query parameters returns a list of promotions applicable to that country or region and segment. Details include:

- Number of promotions available
- Name and description of each promotion
- Start and end dates
- Indication of whether the offer is automatically applied
- Products required, including product ID, SKU, and term
- Pricing policies, such as the policy type and value.

Verify promotions before being billed

Verify promotions before being billed

Partners can check the estimates file or unbilled open period line items on the Partner Center billing page or call the Partner Center APIs to see if promotions were applied to a transaction. The **PromotionID** indicates whether the promotion was applied, and the **EffectiveUnitPrice** indicates the price after discount. On average, these details update six hours after the transaction. However, sometimes they can take as little as one hour or as long as 24 hours due to system latency. Partners can also verify if the promotion was applied in the Partner Center order history and activity logs.

Important

A subscription acquired with a promotion disables the ability to change term and billing cycle. Partners that need to change these properties must wait until the end of the current subscription term, then acquire a new subscription — letting the old subscription end and turning off auto-renew. This is true for both mid-term changes and scheduled changes.

Additional information

How the discount is calculated

The discount is calculated as (promo price – unit price) / unit price. Promotions don't apply to nonprofit, academic, and government prices available in CSP.

Purchase price and details

- Promotional details can be viewed using the Partner Center API or by viewing the promotion in the Partner Center catalog.
- Apply the percentage discount in the promotion details to unit prices on the posted price list to determine the expected price.
- You can find purchased promotions in the reconciliation file after the purchase is billed.

Autorenewal

- **Annual:** at the end of a 12-month subscription, the promotion renews into the regular price, which includes any announced price changes.
- **Monthly:** renews monthly at the promo price during the promo term; once the promotion ends, the subscription renews into the regular SKU price, including any increases that took effect during the promo period.

Midterm conversions and promotions

- Midterm conversions of term or billing plan are not currently possible if the subscription was purchased via a promotion, including the monthly and annual term promotional discounts on commercial seat-based offers in new commerce.
- If a subscription has a promotion applied, the term and billing plans can be changed only at the end of the subscription's term.
